## **DETAILED ACTION**

### ***Response to Amendment***

1. This Office action is taken in response to Applicant's communication filed November 28, 2003 responding to Official Action dated July 23, 2003. Applicant amendments and/or arguments have been considered with the results that follow.
2. Claims 1-8 were originally presented in the application under examination. Of the original claims, no claim has been canceled; new claim 9 has been added. Therefore, claims 1-9 are now pending in the application.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 2, 4, and 6-7 have been fully considered but are not deemed to be persuasive for at least the following remarks.

With respect to claim 2, Applicant argues that RAM memory buffer 28 of Cornaby et al (US 5,875,349) is not a cache but agrees that RAM memory buffer 28 is in hard drive 27 shown in Fig. 1. Cornaby discloses (Col. 4, Lines 7-15; Col. 1, Lines 13-16) storing operating data and code in the system RAM for controlling the operation of the data storage device and for use by the host computer and/or the data storage device. This fact classifies RAM memory buffer as cache because staging of data and destaging of the data are performed into/from the cache memory. Cornaby further discloses (see Col. 14, Lines 14-43) loading at anytime after start-up operating code or data into the system memory with such operating data/code being updatable to allow

operating data/code to be updated by simply transferring the updated version from the RAM system RAM to the storage device of the hard disk.

Applicant further argues that, even if the RAM buffer memory 28 was a cache, the host computer module 11 of Cornaby does not manipulate the cache that is on the hard drive. However, Col. 15, lines 27-30 discloses the operating code/data are host computer executable making up a host executable firmware. Even if the host computer module 11 of Cornaby did not manipulate the cache, claim 2 requires user defined information "**or**" operating information of the external storage system.

With these remarks, rejection with respect to claims 2, 4, and 6-7 is maintained and repeated below.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 2, 4, and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,875,349 (Cornaby et al).

Cornaby discloses a conventional system, an external storage subsystem (Hard disk drive 19, 27, Fig. 1) comprising: a cache memory (RAM memory buffer 28, 34) to store operating data and code for controlling the operation of the data storage device in

the system RAM for use by the host computer and/or the data storage device (Col. 4, Lines 7-15; Col. 1, Lines 13-16]; and SCSI (small computer system interface) adapter card) Col. 4, Line 54-55) through which a connection with host computer module 11 can be established for reading and writing data [Col. 7, Lines 44-59], wherein staging of the data into the cache memory and destaging of the data from the cache memory are performed according to system BIOS code 14 from the host computer module 11 [Col. 5, Lines 26-49, Lines 54-63].

As to claim 2, Cornaby discloses an external storage subsystem having a cache memory to store data temporarily Col. 4, Lines 7-15; Col. 1, Lines 13-16], and in which user data is stored in the cache memory and removed from the cache memory based on user defined information or upon operating information of the external storage subsystem [Col. 6, Lines 56-59].

With respect to claims 4 and 6-7, Cornaby discloses storage in or removal from the cache memory of the user data is executed in a processing unit of data-set domain [(system BIOS and extension BIOS) Col 6, Lines 13-28, Lines 53-56].

#### ***Allowable Subject Matter***

6. Claims 1, 3, 5, 8-9 are allowed.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

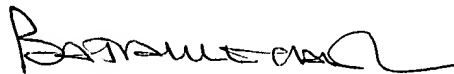

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
